Subject Index of Volume 80

Acenaphthylene
a mechanistic study of photodecomposition of acenaphthylene on a dry silica surface, 103
Aggregate formation
applications of chemometric methods to spectroscopic studies of aggregate formation and twisted intramolecular charge transfer in the gas phase and in non-polar solvents, 443
AM1 study
photochemistry of planar E-hexatrienes: an AM1 study, 121
2-Aminobenzyl alcohol
photosolvolysis of 2-aminobenzyl alcohol in aqueous solution, 225
7-Aminocarbostyrils
hydrogen bonding of aromatic amines in hydroxylic solvents. 2. Absorption and emission spectroscopy of substituted 7-aminocoumarins and 7-aminocarbostyrils, 113
7-Aminocoumarins
hydrogen bonding of aromatic amines in hydroxylic solvents. 2. Absorption and emission spectroscopy of substituted 7-aminocoumarins and 7-aminocarbostyrils, 113
Aniline derivatives
conformation dependence of electron transfer in jet-cooled anthracene complexes with aniline derivatives, 95
Antenna effect
studies of the antenna effect in polymer molecules. 25. Photozymes with rose bengal chromophores, 367
Anthracene
a study on the photophysical properties of anthracene in zeolite, 331
time and temperature dependence of anthracene triplet yields in frozen aqueous micellar solutions: an electron paramagnetic resonance study, 361
Anthracene photo-oxidation
media effects on the kinetics of anthracene photo-oxidation in polymers, 375
Aromatic amines
hydrogen bonding of aromatic amines in hydroxylic solvents. 2. Absorption and emission spectroscopy of substituted 7-aminocoumarins and 7-aminocarbostyrils, 113
Atomic force microscopy
atomic force microscopy and solid state photolyses: phase rebuilding, 397
Aza aromatics
mechanisms of fluorescence quenching by hydrogen bonding in various aza aromatics, 157

Benzyl radical
photon-induced unimolecular decay of the benzyl radical: first direct identification of the reaction pathway to C_7H_6, 33

C_7H_6
photon-induced unimolecular decay of the benzyl radical: first direct identification of the reaction pathway to C_7H_6, 33
Carbazole derivatives
investigation of carbazole derivatives and their van der Waals complexes in the jet by laser-induced fluorescence spectroscopy, 7
Carbon tetrachloride
Cl (^2P_j) fine structure quantum yields from UV dissociation of PCl_3, CCl_4, $CHCl_3$ and Cl_2 in a supersonic jet, 17
CFO radical O_2
Fourier transform IR product study of the reaction of CFO radicals with O_2 at 298 K, 387
CF radicals
resonance-enhanced multiphoton ionization (REMPI) spectroscopy of photolytically generated hot CF radicals, 61
Chemometric methods
applications of chemometric methods to spectroscopic studies of aggregate formation and twisted intramolecular charge transfer in the gas phase and in non-polar solvents, 443
Chlorofluorobenzenes
photophysics of chlorofluorobenzenes: enhancement of sensitized phosphorescence due to cluster formation, 39
Chloroform
Cl (^2P_j) fine structure quantum yields from UV dissociation of PCl_3, CCl_4, $CHCl_3$ and Cl_2 in a supersonic jet, 17
Chlorotoluene
photophysics and photochemical dynamics of chlorotoluene molecules, 145
Cis Co(III)-diisothiocyanatotetram(m)ine
photoredox behaviour of *trans* and *cis* Co(III)-diisothiocyanatotetram(m)ine complexes, 269
Cluster formation
photophysics of chlorofluorobenzenes: enhancement of sensitized phosphorescence due to cluster formation, 39
application of fractals and kinetic equations to cluster formation, 53
Cyclic oligomers
photochemistry of linear and cyclic oligo- and poly(aryleneethenylene)s — applications in materials science, 391

Deconvolution processing
development of a new fluorescence decay measurement system using two-dimensional single-photon counting, 427
Degradation
mechanistic investigations and spectrokinetic parameter determination during thermoreversible photochromism with degradation: example of application to the triphenylimidazolyl dimer (TPID) system, 249
Dibenzo-1,4-dioxins 2,2′-biphenylquinones
photochemistry of dibenzo-1,4-dioxins: intramolecular rearrangement-reduction through observable 2,2′-biphenylquinones, 197

Dielectric breakdown
synthesis of iron–cobalt ultrafine particles by decomposition of $Fe(CO)_5$–$Co(CO)_3NO$ using a TEA CO_2 laser, 421
5,8-Dimethyl-1-tetralone
comparative theoretical study of intramolecular proton transfer in the photochemical cycles of 2-(2′-hydroxyphenyl)benzoxazole and 5,8-dimethyl-1-tetralone, 135
Di(naphthyl)propane
excimer kinetics in di(naphthyl)propane, 175
4-*N*,*N*-Dimethylaminopyrimidine
dual fluorescence of 4-*N*,*N*-dimethylaminopyridine. Role of hydrogen-bonded complex in the ground state, 125
DODAB vesicles
temperature-induced structural and permeability changes in dioctadecyldimethylammonium bromide (DODAB) vesicles: a fluorescence investigation using 2-[(*p*-methylamino)phenyl]-3,3-dimethyl-5-carboethoxy-3H-indole as a probe, 305
Dynamics
photodissociation from an in-plane rotation in water as a direct probe of dynamics, 23
photophysics and photochemical dynamics of chlorotoluene molecules, 145

E-hexatriene
photochemistry of planar E-hexatrienes: an AM1 study, 121
Electron acceptor
photochemical reactions of gadolinium(III) tetraphenylporphyrin in toluene solution containing an electron acceptor or donor, 255
Electron donor
photochemical reactions of gadolinium(III) tetraphenylporphyrin in toluene solution containing an electron acceptor or donor, 255
Electron paramagnetic study
time and temperature dependence of anthracene triplet yields in frozen aqueous micellar solutions: an electron paramagnetic resonance study, 361
Electron transfer
conformation dependence of electron transfer in jet-cooled anthracene complexes with aniline derivatives, 95
electron and singlet energy transfer in rigid supramolecular systems, 321
Environmental effects
proton transfer in excited electronic states: environmental effects on the tautomerization of 2-pyridone, 209
Ethane–O_2
laser-induced oxidation reactions in supercritical ethane–O_2 mixtures, 437
Excimer kinetics
excimer kinetics in di(naphthyl)propane, 175
Excitation transfer
mechanisms of excitation transfer in multichromophoric systems, 353
Excited states
proton transfer in excited electronic states: environmental effects on the tautomerization of 2-pyridone, 209
two-photon excitation of alkyl-substituted magnesium phthalocyanine: radical formation via higher excited states, 287
persulphate quenching of the excited state of ruthenium(II) tris-bipyridyl dication: thermal reactions, 297

Femtosecond intermolecular electron transfer
femtosecond intermolecular electron transfer in condensed systems, 167
Fenarimol
environmental and laboratory studies of the photodegradation of the pesticide fenarimol, 407
Fluorescence
dual fluorescence of 4-*N*,*N*-dimethylaminopyridine. Role of hydrogen-bonded complex in the ground state, 125
temperature-induced structural and permeability changes in dioctadecyldimethylammonium bromide (DODAB) vesicles: a fluorescence investigation using 2-[(*p*-methylamino)phenyl]-3,3-dimethyl-5-carboethoxy-3H-indole as a probe, 305
Fluorescence decay
development of a new fluorescence decay measurement system using two-dimensional single-photon counting, 427
Fluorescence quenching
mechanisms of fluorescence quenching by hydrogen bonding in various aza aromatics, 157
Fourier transform IR
Fourier transform IR product study of the reaction of CFO radicals with O_2 at 298 K, 387
Fractals
application of fractals and kinetic equations to cluster formation, 53

Gadolinium(III) tetraphenylporphyrin
photochemical reactions of gadolinium(III) tetraphenylporphyrin in toluene solution containing an electron acceptor or donor, 255
Ground state
dual fluorescence of 4-*N*,*N*-dimethylaminopyridine. Role of hydrogen-bonded complex in the ground state, 125

Hydrogen bonding
hydrogen bonding of aromatic amines in hydroxylic solvents. 2. Absorption and emission spectroscopy of substituted 7-aminocoumarins and 7-aminocarbostyrils, 113
mechanisms of fluorescence quenching by hydrogen bonding in various aza aromatics, 157
Hydrogen tunelling
pathways of spontaneous and photoinduced hydrogen tunnelling in organic crystals, 349
2-(2′-Hydroxyphenyl)benzoxazole
comparative theoretical study of intramolecular proton transfer in the photochemical cycles of 2-(2′-hydroxyphenyl)benzoxazole and 5,8-dimethyl-1-tetralone, 135

Indolinospirooxazines
substituent effect on photochromism of indolinospirooxazines, 219
In-plane rotation
photodissociation from an in-plane rotation in water as a direct probe of dynamics, 23
Intramolecular proton transfer
comparative theoretical study of intramolecular proton transfer in the photochemical cycles of 2-(2′-hydroxyphenyl)benzoxazole and 5,8-dimethyl-1-tetralone, 135
Iron–cobalt ultrafine particles
synthesis of iron–cobalt ultrafine particles by decomposition of $Fe(CO)_5$–$Co(CO)_3NO$ using a TEA CO_2 laser, 421

Jet
investigation of carbazole derivatives and their van der Waals complexes in the jet by laser-induced fluorescence spectroscopy, 7

Jet-cooled anthracene complexes
conformation dependence of electron transfer in jet-cooled anthracene complexes with aniline derivatives, 95

Kinetic equations
application of fractals and kinetic equations to cluster formation, 53
Kinetics
media effects on the kinetics of anthracene photo-oxidation in polymers, 375

Laser-induced fluorescence spectroscopy
investigation of carbazole derivatives and their van der Waals complexes in the jet by laser-induced fluorescence spectroscopy, 7
Laser-induced orientational change
laser-induced orientational change of nematic liquid crystalline molecules mediated by photochromic reactions of surface azobenzenes, 431
Laser-induced oxidation
laser-induced oxidation reactions in supercritical ethane–O_2 mixtures, 437
Laser jet
two-photon chemistry in the laser jet: generation of radical intermediates and their photochemical transformations, 185
Light-induced electron-transfer reactions
supramolecular assemblies for light-induced electron-transfer reactions, 339

Magnesium phthalocyanine
two-photon excitation of alkyl-substituted magnesium phthalocyanine: radical formation via higher excited states, 287
Mechanistic investigations
mechanistic investigations and spectrokinetic parameter determination during thermoreversible photochromism with degradation: example of application to the triphenylimidazolyl dimer (TPID) system, 249
Metal carbynes
photo-oxidation of metal carbynes, 263
Mixed-metal supramolecular
photochemical properties of mixed-metal supramolecular complexes, 313
Molecular beam measurements
molecular beam measurements of small specific rate constants for unimolecular reactions, 67
Molecular chlorine
Cl (^2P_j) fine structure quantum yields from UV dissociation of PCl_3, CCl_4, $CHCl_3$ and Cl_2 in a supersonic jet, 17
Morphology
morphology-dependent stimulated Raman scattering (MDSRS), 379

Naphthalene
solvatochromic shifts of naphthalene and pyrene excimers, 151
NCCN
vector and scalar correlations in the photodissociation of NCCN, 45
Nematic liquid crystalline molecules
laser-induced orientational change of nematic liquid crystalline molecules mediated by photochromic reactions of surface azobenzenes, 431
$NF(^1\Sigma^+)$
comparative analysis of the collisional deactivation of $O_2(^1\Delta_g)$, $O_2(^1\Sigma_g^+)$, $SO(^1\Sigma^+)$, $SeO(^1\Sigma^+)$ and $NF(^1\Sigma^+)$ by small polyatomic molecules, 1
NH_x radical
kinetic studies of NH_x radical reactions, 85

$O_2(^1\Delta_g)O_2(^1\Sigma_g^+)$
comparative analysis of the collisional deactivation of $O_2(^1\Delta_g)$, $O_2(^1\Sigma_g^+)$, $SO(^1\Sigma^+)$, $SeO(^1\Sigma^+)$ and $NF(^1\Sigma^+)$ by small polyatomic molecules, 1
Optical excitation
pathways of spontaneous and photoinduced hydrogen tunnelling in organic crystals, 349
Organic crystals
pathways of spontaneous and photoinduced hydrogen tunnelling in organic crystals, 349
Organic films
oxygen quenching of tris(2,2′-bipyridine) ruthenium(II) complexes in thin organic films, 281
Orientation?
photoinduced electron transfer variables: rigidity or orientation?, 239
Oxygen quenching
oxygen quenching of tris(2,2′-bipyridine) ruthenium(II) complexes in thin organic films, 281

Persulphate quenching
persulphate quenching of the excited state of ruthenium(II) tris-bipyridyl dication: thermal reactions, 297
Pesticide
environmental and laboratory studies of the photodegradation of the pesticide fenarimol, 407
Phase rebuilding
atomic force microscopy and solid state photolyses: phase rebuilding, 397
4-Phenoxybut-1-enes
intramolecular photocycloaddition reactions of 4-phenoxybut-1-enes, 231
Phosphorescence
photophysics of chlorofluorobenzenes: enhancement of sensitized phosphorescence due to cluster formation, 39
Phosphorus trichloride
Cl (^2P_j) fine structure quantum yields from UV dissociation of PCl_3, CCl_4, $CHCl_3$ and Cl_2 in a supersonic jet, 17
Photochromic
photoinduced optical anisotropy in films of photochromic liquid crystalline polymers, 451
Photochromic reactions
laser-induced orientational change of nematic liquid crystalline molecules mediated by photochromic reactions of surface azobenzenes, 431
Photochromism
substituent effect on photochromism of indolinospirooxazines, 219
Photocycloaddition
intramolecular photocycloaddition reactions of 4-phenoxybut-1-enes, 231
Photodecomposition
a mechanistic study of photodecomposition of acenaphthylene on a dry silica surface, 103
photodecomposition of several compounds commonly used as sunscreen agents, 415
Photodegradation
environmental and laboratory studies of the photodegradation of the pesticide fenarimol, 407

Photodissociation
photodissociation from an in-plane rotation in water as a direct probe of dynamics, 23
vector and scalar correlations in the photodissociation of NCCN, 45
photodissociation of state-selected cluster ions studied by mass-selective, pulsed-field threshold ionization spectroscopy, 73
Photoinduced electron transfer
photoinduced electron transfer variables: rigidity or orientation?, 239
Photoinduced optical anisotropy
photoinduced optical anisotropy in films of photochromic liquid crystalline polymers, 451
Photolysis
photosolvolysis of 2-aminobenzyl alcohol in aqueous solution, 225
Photon-induced unimolecular decay
photon-induced unimolecular decay of the benzyl radical: first direct identification of the reaction pathway to C_7H_6, 33
Photo-oxidation
photo-oxidation of metal carbynes, 263
Photopolymerization
photochemistry of linear and cyclic oligo- and poly(aryleneethenylene)s — applications in materials science, 391
Photoredox
photoredox behaviour of *trans* and *cis* Co(III)-diisothiocyanatotetram(m)ine complexes, 269
Photosensitizers
photophysics and photochemistry of tetraanthraporphyrazines; attempts to obtain a new generation of photosensitizers, 161
Photozymes
studies of the antenna effect in polymer molecules. 25. Photozymes with rose bengal chromophores, 367
Poly(aryleneethenylene)s
photochemistry of linear and cyclic oligo- and poly(aryleneethenylene)s — applications in materials science, 391
Polymer molecules
studies of the antenna effect in polymer molecules. 25. Photozymes with rose bengal chromophores, 367
Polymers
media effects on the kinetics of anthracene photo-oxidation in polymers, 375
photoinduced optical anisotropy in films of photochromic liquid crystalline polymers, 451
Proton transfer
proton transfer in excited electronic states: environmental effects on the tautomerization of 2-pyridone, 209
Pyrene
solvatochromic shifts of naphthalene and pyrene excimers, 151
2-Pyridone
proton transfer in excited electronic states: environmental effects on the tautomerization of 2-pyridone, 209

Radical formation
two-photon excitation of alkyl-substituted magnesium phthalocyanine: radical formation via higher excited states, 287
Radical intermediates
two-photon chemistry in the laser jet: generation of radical intermediates and their photochemical transformations, 185
Raman scattering
morphology-dependent stimulated Raman scattering (MDSRS), 379
(REMPI) spectroscopy
resonance-enhanced multiphoton ionization (REMPI) spectroscopy of photolytically generated hot CF radicals, 61
Rigidity
photoinduced electron transfer variables: rigidity or orientation?, 239
Rose bengal
studies of the antenna effect in polymer molecules. 25. Photozymes with rose bengal chromophores, 367
Ruthenium(II) complexes
oxygen quenching of tris(2,2′-bipyridine) ruthenium(II) complexes in thin organic films, 281
Ruthenium(II) tris-bipyridyl
persulphate quenching of the excited state of ruthenium(II) tris-bipyridyl dication: thermal reactions, 297

Scalar correlations
vector and scalar correlations in the photodissociation of NCCN, 45
$SeO(^1\Sigma^+)$
comparative analysis of the collisional deactivation of $O_2(^1\Delta_g)$, $O_2(^1\Sigma_g^+)$, $SO(^1\Sigma^+)$, $SeO(^1\Sigma^+)$ and $NF(^1\Sigma^+)$ by small polyatomic molecules, 1
Single-photon counting
development of a new fluorescence decay measurement system using two-dimensional single-photon counting, 427
Singlet energy transfer
electron and singlet energy transfer in rigid supramolecular systems, 321
$SO(^1\Sigma^+)$
comparative analysis of the collisional deactivation of $O_2(^1\Delta_g)$, $O_2(^1\Sigma_g^+)$, $SO(^1\Sigma^+)$, $SeO(^1\Sigma^+)$ and $NF(^1\Sigma^+)$ by small polyatomic molecules, 1
Solid state photolyses
atomic force microscopy and solid state photolyses: phase rebuilding, 397
Solvatochromic shifts
solvatochromic shifts of naphthalene and pyrene excimers, 151
Spectrokinetic parameter determination
mechanistic investigations and spectrokinetic parameter determination during thermoreversible photochromism with degradation: example of application to the triphenylimidazolyl dimer (TPID) system, 249
State-selected cluster ions
photodissociation of state-selected cluster ions studied by mass-selective, pulsed-field threshold ionization spectroscopy, 73
Sunscreen
photodecomposition of several compounds commonly used as sunscreen agents, 415
Supersonic jet
Cl (^2P_j) fine structure quantum yields from UV dissociation of PCl_3, CCl_4, $CHCl_3$ and Cl_2 in a supersonic jet, 17
Supramolecular ruthenium complexes
supramolecular assemblies for light-induced electron-transfer reactions, 339

Supramolecular systems
electron and singlet energy transfer in rigid supramolecular systems, 321
Surface azobenzenes
laser-induced orientational change of nematic liquid crystalline molecules mediated by photochromic reactions of surface azobenzenes, 431

TEA CO_2 laser
synthesis of iron–cobalt ultrafine particles by decomposition of $Fe(CO)_5$–$Co(CO)_3NO$ using a TEA CO_2 laser, 421
Tetraanthraporphyrazines
photophysics and photochemistry of tetraanthraporphyrazines; attempts to obtain a new generation of photosensitizers, 161
Thermoreversible photochromism
mechanistic investigations and spectrokinetic parameter determination during thermoreversible photochromism with degradation: example of application to the triphenylimidazolyl dimer (TPID) system, 249
Trans Co(III)-diisothiocyanatotetram(m)ine
photoredox behaviour of *trans* and *cis* Co(III)-diisothiocyanatotetram(m)ine complexes, 269
Triplet yields
time and temperature dependence of anthracene triplet yields in frozen aqueous micellar solutions: an electron paramagnetic resonance study, 361
Tris(2,2′-bipyridine)
oxygen quenching of tris(2,2′-bipyridine) ruthenium(II) complexes in thin organic films, 281
Twisted intramolecular charge transfer
applications of chemometric methods to spectroscopic studies of aggregate formation and twisted intramolecular charge transfer in the gas phase and in non-polar solvents, 443
Two-photon excitation
two-photon excitation of alkyl-substituted magnesium phthalocyanine: radical formation via higher excited states, 287

Unimolecular reactions
molecular beam measurements of small specific rate constants for unimolecular reactions, 67
UV dissociation
Cl (^2P_j) fine structure quantum yields from UV dissociation of PCl_3, CCl_4, $CHCl_3$ and Cl_2 in a supersonic jet, 17

Van der Waals complexes
investigation of carbazole derivatives and their van der Waals complexes in the jet by laser-induced fluorescence spectroscopy, 7
Vector correlations
vector and scalar correlations in the photodissociation of NCCN, 45

Water
photodissociation from an in-plane rotation in water as a direct probe of dynamics, 23

Zeolite
a study on the photophysical properties of anthracene in zeolite, 331
